

## City of Calgary Selects Freeance Mobile for GIS on BlackBerry

Written by TDC Group

24 September 2009

Sept 24, 2009 - Dayton, Ohio - The City of Calgary Alberta, population 1 million, is looking to expand GIS use and increase productivity of field workers by pushing ESRI ArcGIS Server out to BlackBerry users.

The City IT/GIS group has selected Freeance Mobile for enabling GIS data and applications on the BlackBerry platform for city employees.

Freeance Mobile will be exhibiting at the ESRI Canada Regional User Conference in Toronto October 6th and 7th.

### About Freeance Mobile Software

Freeance Mobile is innovative, easy-to-use location software for efficiently making mobile applications. You can now make your ArcGIS available to anyone, anywhere, anytime. It is hassle-free software for users and IT administrators alike. Designed for the ESRI and BlackBerry environments, Freeance Mobile starts at \$999 per server for unlimited users and combines off-the-shelf simplicity with the ability to make your own custom applications. Visit [www.Freeance.com/mobile](http://www.Freeance.com/mobile) for more information.

### About TDC Group

TDC Group, Inc. develops the Freeance Mobile and Freeance Web software solutions. Established in 1989, TDC Group serves government, utilities and corporate clients with productive, cost-effective and easy-to-use software that reduces the time and resources needed to deploy mobile GIS applications.
