

Where's My Team On Blackberry - Mobile GIS Locator For Field Personnel

Written by TDC Group

08 July 2009

July 8, 2009 - Dayton, Ohio - Now it's possible for BlackBerry users to view their location and the location of their co-workers on GIS maps - live on their BlackBerry smartphone.

Using the latest release of Freeance Mobile software, public safety, utility, field and office workers can view live locations of other BlackBerry users in their organization on a GIS map.

And because it's Freeance Mobile, the background GIS is live from ESRI map services - giving you the ability to control layers, search on map features, display data attributes and even map new points with digital photos right from your BlackBerry smartphone. Freeance Mobile software allows end users to change their location symbolically to signal their current work status, activity, and even show an SOS distress signal.

Freeance Mobile will be at the ESRI User Conference next week in San Diego at the BlackBerry booth demonstrating "Where's My Team" functionality in the latest Freeance Mobile release. Activities at the BlackBerry booth #1603 include presentations from end users and Ricoh, as well as demonstrations of Freeance

Mobile. A special lunch session will be held Thursday at noon highlighting the best uses of GIS On BlackBerry from Freeance Mobile clients. The lunch is free and seating is first come, first served. GIS On BlackBerry ESRI UC show schedule. www.freeance.com/mobile

About Freeance Mobile Software

Freeance Mobile is innovative, easy-to-use location software for efficiently making mobile applications. You can now make your ArcGIS available to anyone, anywhere, anytime. It is hassle-free software for users and IT administrators alike. Designed for the ESRI and BlackBerry environments, Freeance Mobile starting at \$999 for unlimited users and combining off-the-shelf simplicity with the ability to make your own custom applications. Visit <http://www.Freeance.com/mobile> for more information.

About TDC Group
